

**57<sup>th</sup> Annual International Congress  
*of the*  
Egyptian Orthopaedic Association**

***21-24 November , 2005  
Grand Hyatt Hotel,  
Cairo - Egypt***

**Under The Patronage  
OF**

***H. E. Mrs. Suzane Mubarak***

**PROGRAM  
2005**

*Dear colleagues,*

*On the occasion of the 57<sup>th</sup> annual international congress of the Egyptian Orthopaedic Association, I like to express my great pleasure in welcoming all of you to this great event.*

*Over the past years, our congress has been well known for its rich scientific and social activities. I hope that this year it will be up to your expectations and as successful as the previous ones. This year we have scientific coverage of all the orthopaedic subspecialties in the form of lectures, paper, poster presentations and workshops. The lectures will be delivered by distinguished international and Egyptian speakers.*

*New horizons in orthopaedic surgery like CAOS, mini-invasive surgeries will be also covered by lectures and workshops.*

*As Cairo is the city of historical and modern civilizations, the organizing committee did not endeavor any effort to arrange for a busy enjoyable social program.*

*I hope that our international guests will enjoy their stay in Egypt and the well known Egyptian hospitality and wish them a safe return home.*

*Last and not least I extend my thankfulness to the organizing committee for the efforts and time they spent to get this congress into reality.*

*Yours Sincerely*

***Professor Nabil Khalifa***

President of the Congress  
President of the E. O. A.  
2005

*Dear guests and colleagues,*

*The specialty of orthopaedic surgery and traumatology as a science and practice is expanding enormously ,making it difficult to cover all aspects in one activity. This congress has been planned and implemented to provide educational information in addition to an assemblage of contemporary though leaders probing the boundaries of new ,interesting and evolving issues.*

*The traditional formats of presentation including instructional lectures, papers, posters are assembled to provide the optimal learning opportunity, the area of dialog had been increased on the expense of the monologue pattern .*

*Interactive activities inviting the floor to participate actively in the discussions are one of the main features of this congress, Nile- side discussion as a group discussion gathering expertise in different topics with the members of the congress have an amble time in the program .The twinkling star of this congress is the topic of assisted computer orthopaedic surgery (ACOS) which is arranged in different formats by professional worldwide leaders and experts .*

*Our aim as a team responsible for this congress is to satisfy your ambitions and requests both on the scientific and social side. We are waiting to welcome you all on Monday 21 of November, wishing the best of luck for you all .*

*Sincerely yours  
Prof. Samir Kotb  
Prof. Ezzat Kamel  
Prof. Mohamed Fadel*

*Dear colleagues,*

*It will be a pleasure to meet you in our congress after a great success in the previous congresses. As the congress treasurer, I seek to achieve the balance between offering the maximum scientific standard for the participants and the social one for the companions, and to achieve the utmost level of interest to the association. The association treasury is a serious duty. We must not only preserve it but also improve our association day after day since the association has become one of the best of its kind nationally and internationally. The association also has a remarkable position in scientific experiment; it offers scientific services of high level represented in the common courses with some of the international associations. We spared no effort to make the congress this year a scientific celebration for the participants and their companions on both the scientific and the social level.*

*Finally, I would like to welcome our Overseas and Arab guests for their participation, I wish them a fruitful stay and the best of every thing.*

*Congress & EOA Treasurer  
Prof. Hazem Abdel Azeem*

| P21 | Management of flexion knee deformity using a circular frame.<br><b>Gamal Hosny</b><br>Egypt                   |
| P22 | Static Un-reamed Interlocking Nail in the Treatment of Femoral Shaft Fractures.<br><b>Yehia Rady</b><br>Egypt |

# **CONGRESS FRIENDS**

*The congress organizing committee would like to express their gratitude to the medical companies for their co-operation to help us in making this congress a success.*

*This ward of thanks is for the companies mentioned here and those who registered after printing the program.*

**Misr Medical Co. (Tantawi)**

**Tiba**

**MSD**

**Bristol-Myers Squibb**

**Copad**

**Pyramids Scientific Office**

**EVA Pharma**

**Queen Pharma**

**E.P.C. Nycomed**

**Novartis**

**International Medical Services Center**

**Pfizer**

**Paul Hartmann-Egypt**

**El-Fath**

**Sanofi- Aventis**

**Liptis Pharma**

**Mepha**

**Pyramids Company for Medical Equipments**

**Apex Pharma**

**Minapharm**
