Egyptian Orthopaedic
Association**

*14-17 December, 2009
J.W. Marriott Hotel,
Cairo - Egypt*

Under The Patronage

of

H. E. Mrs. Suzane Mubarak

**PROGRAM
2009**

Dear Guests & Colleagues:

Welcome to the 61st international congress of the glorious Egyptian Orthopaedic association (EOA). We heartily welcome the participation of orthopaedic surgeons from more than 20 arab and foreign countries, they will interchange experience with their Egyptian colleagues in different subspecialties of orthopaedic surgery. We are looking forward to upgrade the level of knowledge of the attendees to the state of the art in these fields.

After the remarkable success of the pervious EOA congresses, we are proud to say that this yearly event had become a well recongnised highly celebrated scientific gathering. This urged two outstanding international societies: namely the SRS and IFPOS to arrange courses in association with us .

Thanks are due to my colleagues members of the congress board for their incredibly speedy help in preparation, organization and running after each detail to make this congress an enjoyable event from all aspects: scientific, social and recreational .

For our international and arab guests, welcome to Egypt, the land of peace, history and civilization. We wish you a happy stay in our country and safe return home. Hoping to see you next year .

EOA & Congress President

Prof. Khamis El-Deeb

Dear Colleagues,

I would like to express my great pleasure for being here with you in this great event. This congress which I myself look forward every year to attend as a scientist who is eager to participate in this unique gathering of lecturers , professors and speakers from Egypt and all over the world.

The progress that has been achieved in the association is remarkable. It is the outcome of the collaborative hard work and dedication of many people, whom I seize the chance to thank and pay my gratitude. The association proves year after year that it stands on equal footing with its peers form all over the world. This congress would last for a couple of days but I assure you that its preparation took us a whole year of hard work and dedication to live up to your expectations. It grows as they say "slowly but surely".

*As you may have noticed in the past few years, the association has paid attention not only to the preparation of a rich scientific program but also to the tailoring of a very interesting social one. On one hand, we have a diversity of lectures, seminars and speeches delivered by distinguished speakers. Although the traditional format is used but the material presented this year is very rich and beneficial that would suit all tastes
On the other hand we prepared a very entertaining social program which I am sure you would enjoy. It will give you the chance to know more about Egypt the cradle of civilization and culture.*

Finally, I would like to welcome you all again in this scientific celebration which proves year after year its quality and strength; and stands the test of time.

Congress General Secretary

Prof. Osama Hegazy

Dear Colleagues,

It is a great pleasure for me to meet you in our annual congress. The congress treasurer is not only a prestigious post as it sounds it is a serious duty which faces new challenges. I seek to achieve the balance between offering the maximum scientific standard for the participants and the social one for the companions, and to achieve the utmost level of interest to the association. In spite of the financial challenges that we face every year we spare no effort to come up with the best solutions to work them out. Year after year the association grows trying to maintain the registration fees as it is without affecting the quality of the material presented in the congress. We do our best to make the maximum use of the resources we have and I am personally so proud to see our association growing steadily year after year. It is crystal clear that the association has a remarkable position in scientific experiment; it offers scientific services of high level presented in the common courses with some of the international associations. I am so proud to announce that the congress will embrace 2 great events the IFPOS pediatric orthopedic course, and the SRS spine course. Because the social program is not less important than the scientific one we prepared a rich program which you would definitely enjoy both the participants and their families. The different activities will enable all members, guests and families to mingle and form strong relations that would last after the congress is over. Finally, I would like to welcome our national and international guests for their participation. I wish them a fruitful stay on both the scientific and the social level.
